No. 345. WHEREAS, many thousands of Pittsburgh's older residents who worked hard all their lives to build this city spend the latter portion of their lives residing in nursing homes; and,

WHEREAS, repaying our collective debt to these disabled citizens by providing the best care possible in our nursing homes should be one of the highest priorities in our society; and,

No. 449. RESOLUTION amending Resolution No. 606, Item J, approved July 29, 1988 which authorized the sale of a vacant lot, 75' x 160.17', Block 32 E, Lot pt. 293 and a vacant lot 17.07' x 161' x 50.1 RR, Block 32 E, Lot 295, located at St. Luca Street, A/K/A Horn Street, Mt. Oliver Borough, to Thomas J. Friend and Dolores J. Friend, his wife, for the sum of \$1,000.00.

The reason for the above amendment is to delete the name of Dolores J. Friend, his wife, as she has since died and, also, it was discovered through the title search that this property was not acquired from the property owners. Mr. Friend is willing, however, to accept a Quit Claim deed from the City. It will, therefore, be necessary to process this sale through the Act of 1937 instead of the Treasurer Sale Act of 1984.

All else in Resolution No. 606, Item J, effective July 29, 1988, shall remain the same and effect.

SECTION 1. Any Resolution or Ordinance or part thereof conflicting with the provisions of this Resolution is hereby repealed so far as the same affects this Resolution.

No. 878. RESOLUTION REQUESTING the Mayor to establish the Pittsburgh Food Policy Commission.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF PITTSBURGH AS FOLLOWS:

SECTION 1. That the Mayor is hereby requested to establish the Pittsburgh Food Policy Commission, as follows:

I. DECLARATION OF POLICY

The City of Pittsburgh recognizes that affordable, safe and nutritious food is a basic human right and need. Access to food is an important problem for the residents of urban areas as we enter the 1990's. Declining and stagnant standards of income for many families, the abandonment of low-income communities by all but the most basic of food shopping outlets, and growing dependence on foods raised or processed long distances from our community all place many city residents at risk of not being able to obtain adequate, affordable, and decent food through normal channels. The results of these problems include declining nutrition and increasing hunger for low-income city residents. The Pittsburgh Food Policy Commission, hereinafter referred to as the Food Commission, shall serve to review and develop municipal policies which impact City Residents' access to food and make recommendations to strengthen the local food supply and distribution system for the benefit of all city residents. The Food Commission shall focus its attention primarily on low-income persons and their communities in the City of Pittsburgh.

II. COMPOSITION

The membership of the Food Commission shall be appointed by the

Mayor with the advice and consent of City Council and shall consist of the following:

- (1) A representative of a local retail grocery chain.
- (2) A representative of an independent food retailer.
- (3) A representative of the wholesale food industry.
- (4) Two (2) private individuals who have food industry expertise.
- (5) Two (2) representatives of Community Development Corporations.
- (6) Two (2) residents of CDBG eligible neighborhoods.
- (7) Two (2) representatives of the Metropolitan Tenants Organization of the Housing Authority of the City of Pittsburgh.
- (8) A representative of an anti-hunger advocacy organization.
- (9) A representative of an emergency food assistance provider.
- (10) A representative of Food Share.
- (11) A representative of a labor union which represents food industry workers.
- (12) Chairperson of the City Council Committee on Planning, Housing and Development.
- (13) Executive Director of the Urban Redevelopment Authority of Pittsburgh.
- (14) Director of the Department of City Planning.
- (15) The Mayor shall request the Director of Nutrition Services of the Allegheny County Health Department to be a member of the Food Commission.

III. QUORUM AND RULES

- (a) The term of each member shall be for two (2) years. In case any vacancy occurs, such vacancy shall be filled for the unexpired term. All appointed members shall serve

without compensation.

- (b) Ten (10) appointed members shall constitute a quorum for the transaction of any business or the decision of any matters within their jurisdiction.
- (c) The Mayor shall designate a Chairperson. The Food Commission shall meet at least monthly and keep minutes of its proceedings. It shall make all other regulations for its organization and procedure, consistent with the laws of the Commonwealth and the Pittsburgh Code. The City shall provide a suitable and convenient facility for meetings of the Commission. The Director of the Department of City Planning shall provide staff to administer the work of the Food Commission. The City shall reimburse members for reasonable expenses, including transportation expenses for meeting attendance, as necessary.

IV. POWERS AND DUTIES

- (a) The Food Commission shall have the following powers and duties:

(1) To examine and review current and proposed policies, practices, and programs of the City of Pittsburgh with regard to their impact, or potential impact, upon access to affordable, safe, and nutritious food for city residents, particularly those of low income. Said policies, practices and programs shall include, but not be limited to, zoning and land use regulations, economic development programs, tax policies, licensing practices, environmental issues, transportation policies and the capital budget and operating

budget of the City of Pittsburgh. The Food Commission shall report its findings to the Mayor, City Council and the public at least semi-annually.

(2) To provide information, reports, policy recommendations and public testimony to the Mayor, City Council, City Departments, and Authorities, as appropriate.

(3) To provide input with respect to the City budgetary process as to funding recommendations with respect to affordable, safe and nutritious food.

(4) To develop and propose policy and program initiatives to improve access to affordable, safe and nutritious food for City residents.

- (b) Within its first year of existence, the policies, practices and programs addressed by the Food Commission shall include, but not be limited to the following:

(1) The impact of the 1991 and 1992 Capital and Operating Budgets and Six-year development program on access to food.

(2) Encouraging development of new and existing grocery stores in underserved communities.

(3) Improving transportation between low income communities and supermarkets.

(4) The impact of City tax policies on food stores in Pittsburgh.

(5) The impact of City capital programs and activities on access to food for City residents.

- (c) Within the first two years of its

existence, the policies, practice and programs addressed by the Food Commission shall include, but not be limited to the following:

- (1) Expansion of support for alternative sources of food such as farmers' markets, community gardening, and development of food buying clubs and consumer cooperatives.
 - (2) The impact of zoning, licensing, and regulatory issues on food marketing in the City of Pittsburgh.
 - (3) Environmental issues affecting the safety, nutritional quality, and affordability of food available to Pittsburgh residents.
 - (4) Protecting the viability of independent food wholesaling in Pittsburgh.
 - (5) Establishing conditions to link receipt of economic development aid to participation in efforts to improve access to food.
- (d) Two years following the creation of the Food Commission, the Commission shall make recommendations as to the need for its continuing operation.

SECTION 2. In the event this resolution cannot take effect in its entirety because of the judgment of any court of competent jurisdiction holding invalid any provision, the remaining provisions of this resolution shall be given full force and effect as completely as if the provision held invalid were not included.

SECTION 3. Any Resolution or Ordinance or part thereof conflicting with the provisions of this Resolution is

hereby repealed so far as the same affects this Resolution.

CAC for all of the costs of designing, constructing and/or acquiring the Phase III Capital Projects. Further, the Authority shall provide the funds required to pay all of the costs of designing, constructing and/or acquiring the Phase IV Capital Projects and On-Going Capital Improvements for the Civic Arena. In the event that CAC and the Authority disagree whether to undertake an On-Going Capital Improvement, the same shall be arbitrated in accordance with the following procedures: Three independent professional engineers shall be appointed in accordance with the rules of the American Arbitration Association and the three engineers shall determine in accordance with the rules of the American Arbitration Association whether or not the proposed On-Going Capital Improvement should be undertaken in accordance with the standards set forth herein. No. 1297. WHEREAS, the Steel Valley Authority is an Intermunicipal Jobs Authority which was created by

Pittsburgh and nine Mon Valley milltowns to help economically revitalize distressed communities; and,

WHEREAS, the SVA is a unique "job dislocation strike force" to prevent workers from losing their jobs and to retain essential payrolls and revenues in the City, especially in times of recession; and,

WHEREAS, the SVA has developed, through the City's Intermunicipal agreement and growing relationship with the nine other Mon Valley member communities, additional support in Harrisburg resulting in state funding for city projects; and,

WHEREAS, the SVA has accomplished several major successes for the City in 1989 and 1990, including:

- Redevelopment of Industrial Sites: The SVA helped win passage of \$20 million in the Industrial Communities Site Fund (ICSF); the City received \$2,000,000 for two Pittsburgh sites on the South Side and North Side in 1989. The SVA was also a catalyst in the passage of the new Tax Increment Financing Bond Program.

- Manufacturing Retention and Expansion: The SVA took a lead in the City establishing a new "early warning" business and labor outreach program for firms in distress. The SVA has been directly responsible for retaining or expanding jobs at several firms in the city and valley. Some 500 firms have been surveyed in the city; many received business assistance or URA loans.

- City Pride Bakery: The SVA has taken a lead in organizing a new employee-owned bakery for the city to replace the jobs lost when Braun Bakery closed down. The City Pride Bakery, when financed, will result in 122 jobs, including many of the former Braun workers. Pittsburgh is the largest city in the country without a mainline bakery.

- Cytemp Plant Closure Prevention: As

part of the Early Warning Network, the SVA conducted a pre-feasibility study for the local managers and workers at the Pittsburgh Cytemp plant. As a result of that study, investors have formed a new company, Pittsburgh Flatroll, which plans to retain the facility, invest in the company, and save 40 jobs.

- Employee Ownership: As the foremost public institution in the ESOP field in Western Pennsylvania, the SVA has also made considerable progress at the state level in creating support for workers to buy viable facilities. The SVA led the fight to maintain the ESOP Fund at the state, and utilized this fund for two projects.

NOW, THEREFORE, BE IT RESOLVED, that the Council of the City of Pittsburgh acknowledges through this acclamation its sincere appreciation and support of the efforts of the SVA.

COMMISSION ON HUMAN RELATIONS

The Commission on Human Relations administers the City's fair practices provisions of the City Code which make it unlawful to discriminate on the basis of race, color, religion, ancestry, national origin, place of birth, sex, sexual orientation and non-job related handicaps or disability in employment, housing, and public accommodations. Such complaints are designated as "formal" and may be filed by an individual or organization claiming to be aggrieved by an alleged discriminatory act. The Commission may also initiate complaints in its own name.

Formal complaints are investigated by the staff and reported to the Commission for decisions. Where discrimination is found to exist, attempts are made to seek a satisfactory adjustment by voluntary conciliation. When conciliation fails, the Commission may hold public hearings, issue orders and otherwise seek legal enforcement of its decisions.

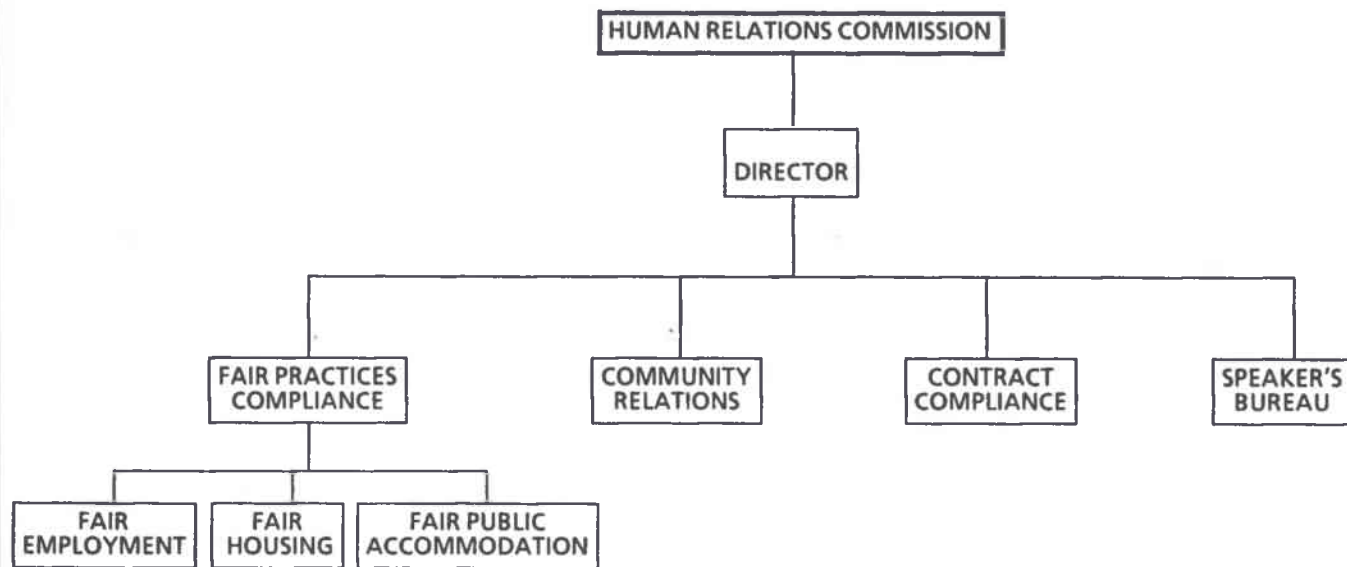

In addition to formal complaints, the Commission is mandated to study and investigate conditions having an adverse effect on intergroup relations in the City of Pittsburgh. Accordingly, the Commission works with community members to attempt settlement of disputes or problems involving prejudice, intolerance or intergroup tension. The Commission also trains Police Officers to assist them in recognizing their vital role in community relations disputes.

The Contract Compliance Specialist, by Executive Order of the Mayor, coordinates activities to assure minority business participation in construction contracts let by the City. This process includes pre-award and post-award compliance monitoring.

Commission members and staff participate in speaking engagements and similar public information and technical assistance activities to further the goals of the Human Relations Ordinance.

As part of its work in fair practices complaints, the Commission cooperates with the federal agencies having concurrent jurisdiction, namely the Equal Employment Opportunity Commission and the Department of Housing and Urban Development.

COMMISSION ON HUMAN RELATIONS

OVERALL GOAL

The Commission's overall goal is to process all complaints of discrimination in a timely and effective manner, to resolve community disputes of an intergroup nature, to continue through educational and training activities the furtherance of good community relations, and to assure participation of minorities and women in all City of Pittsburgh construction contracts.

1989 - 1990 ACCOMPLISHMENTS

- Secured appropriate remedies for victims of discrimination in employment, housing and public accommodations.
- Provided training in community relations for all new police officers.
- Secured more than 9.2 million dollars of minority/women participation in completed City construction contracts.
- Received in-service training regarding the new legislation which prohibits sexual orientation discrimination.

LONG-RANGE OBJECTIVES

- To computerize files and develop a confidential data base.
- To update informational brochures.
- To provide on going in-service training for Commissioners and staff.
- Develop and implement outreach efforts to heighten public awareness of fair housing rights and responsibilities.

SHORT-RANGE OBJECTIVES

- Reduce backlog of cases awaiting public hearing.
- Continue contractual obligations/worksharing with the U.S. Equal Employment Opportunity Commission and the U.S. Department of Housing and Urban Development.
- Continue community relations education and training.
- Continue to process discrimination cases in a timely and effective manner.

OFFICE OF CITY CONTROLLER

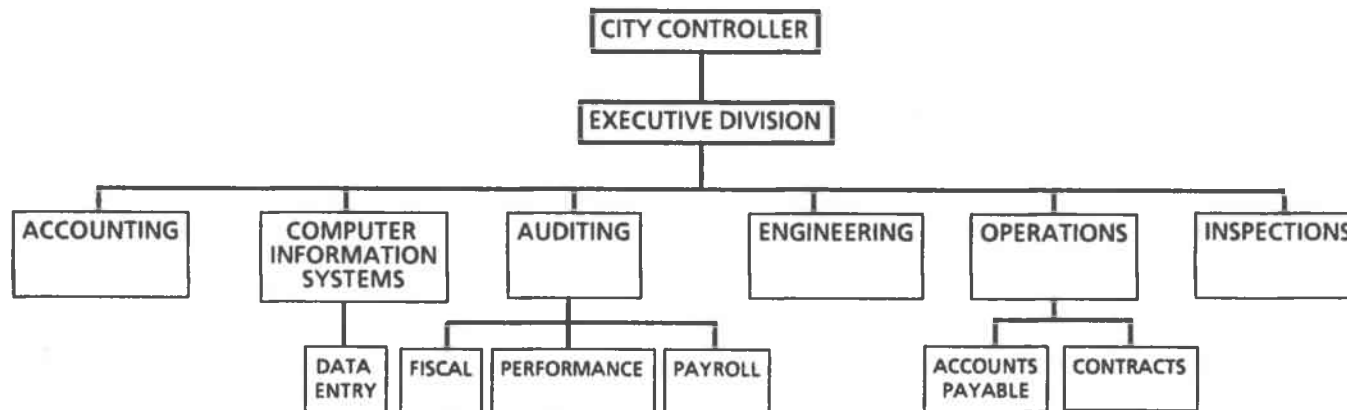

The City Controller is an elected official serving a four-year term of office.

The City Controller's responsibilities are mandated by the Home Rule Charter. The duties of the office include: conducting periodic fiscal and performance audits of units of government and all agencies and trusts; auditing the City payroll; preparing an annual report for Council showing revenues, receipts, debts, and expenditures of the City and its sources; operating a complete accounting system of City accounts in accordance with GASB standards; maintaining separate accounts for every item or appropriation; making certain that no appropriation or account is overdrawn and that no appropriation is spent for any purpose other than that for which it was intended; verifying that sufficient funds are on hand for the payment of warrants; accepting bids for City-let contracts; inspecting City property; auditing the campaign reports required by Section 802 of the Charter for local elections; preparing monthly and quarterly revenue and expenditure reports; approving for form, auditing and countersigning all contracts, agreements, vouchers, and warrants; and completing a final audit of the accounts of all elected officials and officers upon their leaving of office.

In addition to these specific duties, the City Controller has broad powers to monitor the executive and legislative branches of City government. The Home Rule Charter calls for an elected controller as an added check on the use of City resources, and provides for an outside solicitor to further guarantee the independence of the Controller's Office. The City Controller has traditionally responded to citizen complaints and has an active role in the affairs of the community.

The City Controller is also the Controller for the Board of Education and a Director of the Municipal, Police, and Fire Pension Boards.

DEPARTMENT OF FINANCE

The Department of Finance is headed by the Director of Finance and the Deputy Director/City Treasurer, who are appointed by the Mayor. Within the Finance Department there is a General Office under which there are four major divisions: Treasury, Employee Benefits, Tax Collection, and Real Estate.

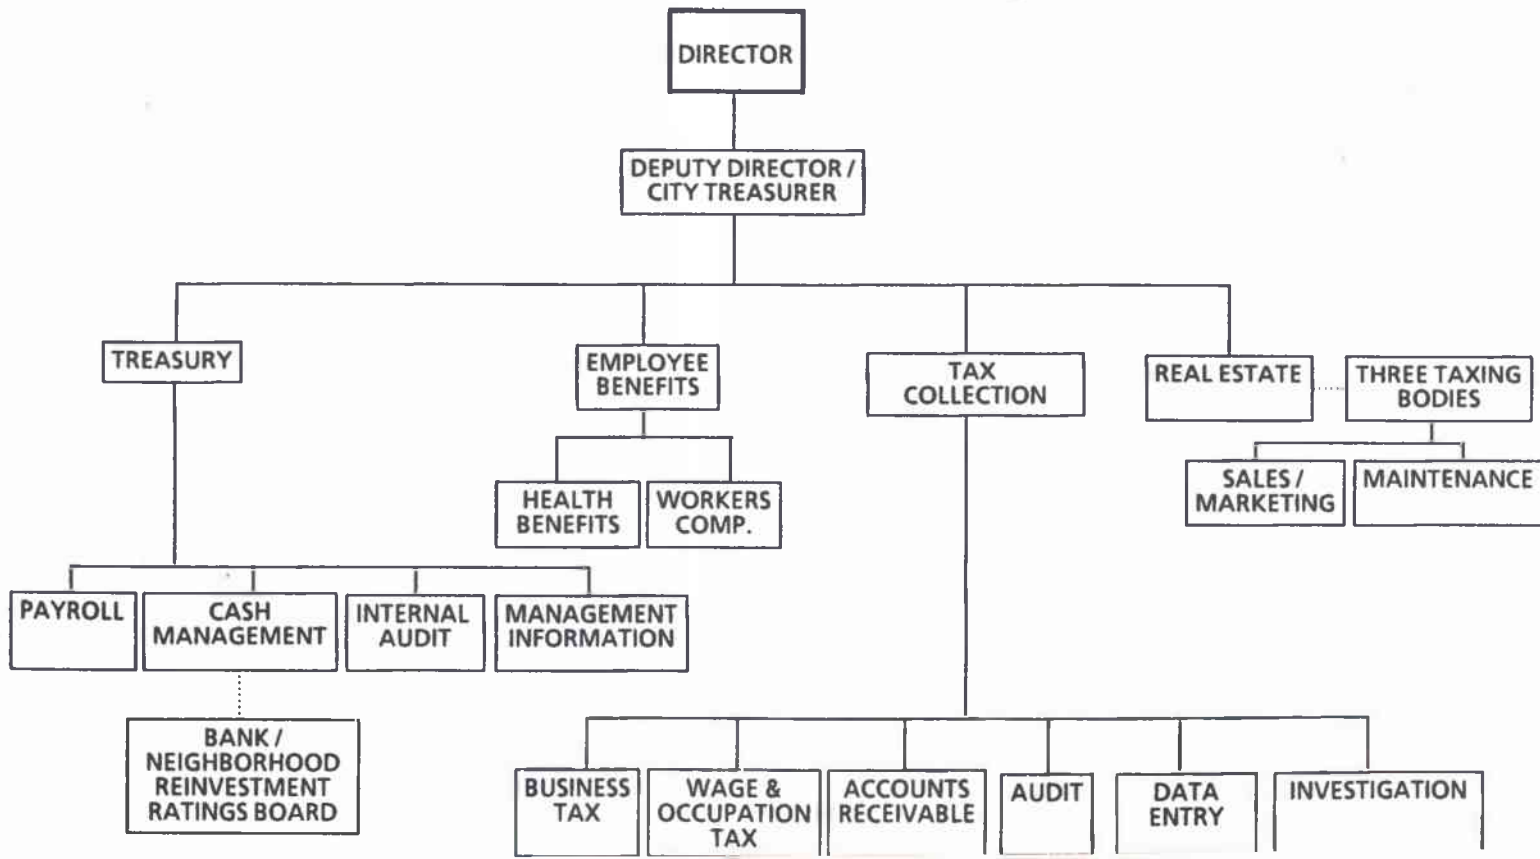

The Treasury Division is comprised of four sections: Cash Management, Payroll, Internal Audit, and Management Information. The Cash Management Section invests all City funds to maximize interest earnings on available cash. The Payroll Section is responsible for ensuring that City paychecks are distributed on a timely basis in accordance with all collective bargaining agreements and government regulations. Internal Audit examines and evaluates the activities of City departments and personnel and assists them in the effective and efficient discharge of their responsibilities. In order to centralize operations, a number of auditor positions will be moved in 1991 from the General Office to the Internal Audit Section of the Treasury Division. Management Information is a new section in 1991. This section generates management reports and is responsible for the organization and coordination of computer use activity between the Finance Department and City Information Systems.

The Employee Benefits Division is responsible for the administration of the City's fringe benefits and workers compensation.

The Tax Collection Division is responsible for collecting all self-assessed taxes due the City and School District. These functions are performed first by the Business Tax and the Wage and Occupation Tax Sections. These sections are supported by the Audit, Investigation, and Accounts Receivable Sections, who enforce compliance with the City's tax laws and collect delinquent taxes. The Data Entry Section supports the tax sections by maintaining and updating all master tax files.

The Real Estate Division is responsible for the billing and collection of real estate taxes due the City and School District and conducting Treasurer's sales of tax delinquent property. They are also responsible for the billing and collection of the City and School District's Personal Property tax and delinquent sewage accounts. The Three Taxing Bodies Section maintains, markets and sells tax delinquent property jointly owned by the City of Pittsburgh, County of Allegheny, and School District of Pittsburgh.

DEPARTMENT OF CITY PLANNING

The main function of the Department of City Planning is to assure that the development and redevelopment of the City occurs in an efficient, equitable and orderly manner for the long-term benefit of its residents. The Department carries out its mission through comprehensive and community planning activities, advising the Mayor and City Council on capital expenditures, administering federal funds for low and moderate income families and areas, and regulating private land through zoning and subdivision control.

The Department of City Planning functions under a nine-member City Planning Commission appointed by the Mayor for six-year staggered terms. The Commission is required by law to prepare and adopt a Master Plan, a requirement which is met through the annual publication of a Six-Year Development Program. This single document combines the long-range plans for the City, the policies and programs for their implementation, and a six-year Capital Program of specific physical improvement projects.

The Department's Comprehensive Planning Division conducts planning studies on a variety of functional areas including: housing, environment, transportation, food supply, economic development and information systems. This work involves liaison with other City and government agencies, as well as the monitoring and evaluation of consultant studies.

The Community Planning and Capital Budget Division is composed of two sections. Through its Community Planning Section the Department provides an ongoing mechanism for community participation. Planners are assigned to clusters of neighborhoods, so that each of Pittsburgh's 88 neighborhoods has a professional planner to provide linkage with City government. In this role, the planner coordinates development and neighborhood plans, engages in land use, zoning and specialized studies, administers public service and community development grant contracts and provides technical assistance. In addition, each community planner is responsible for an area of specialization such as the Neighborhood Business District Revitalization Program, Residential Parking Permit Program, Community Based Organization support, Priorities for the 90's implementation, Neighborhood Plan Coordination and publication.

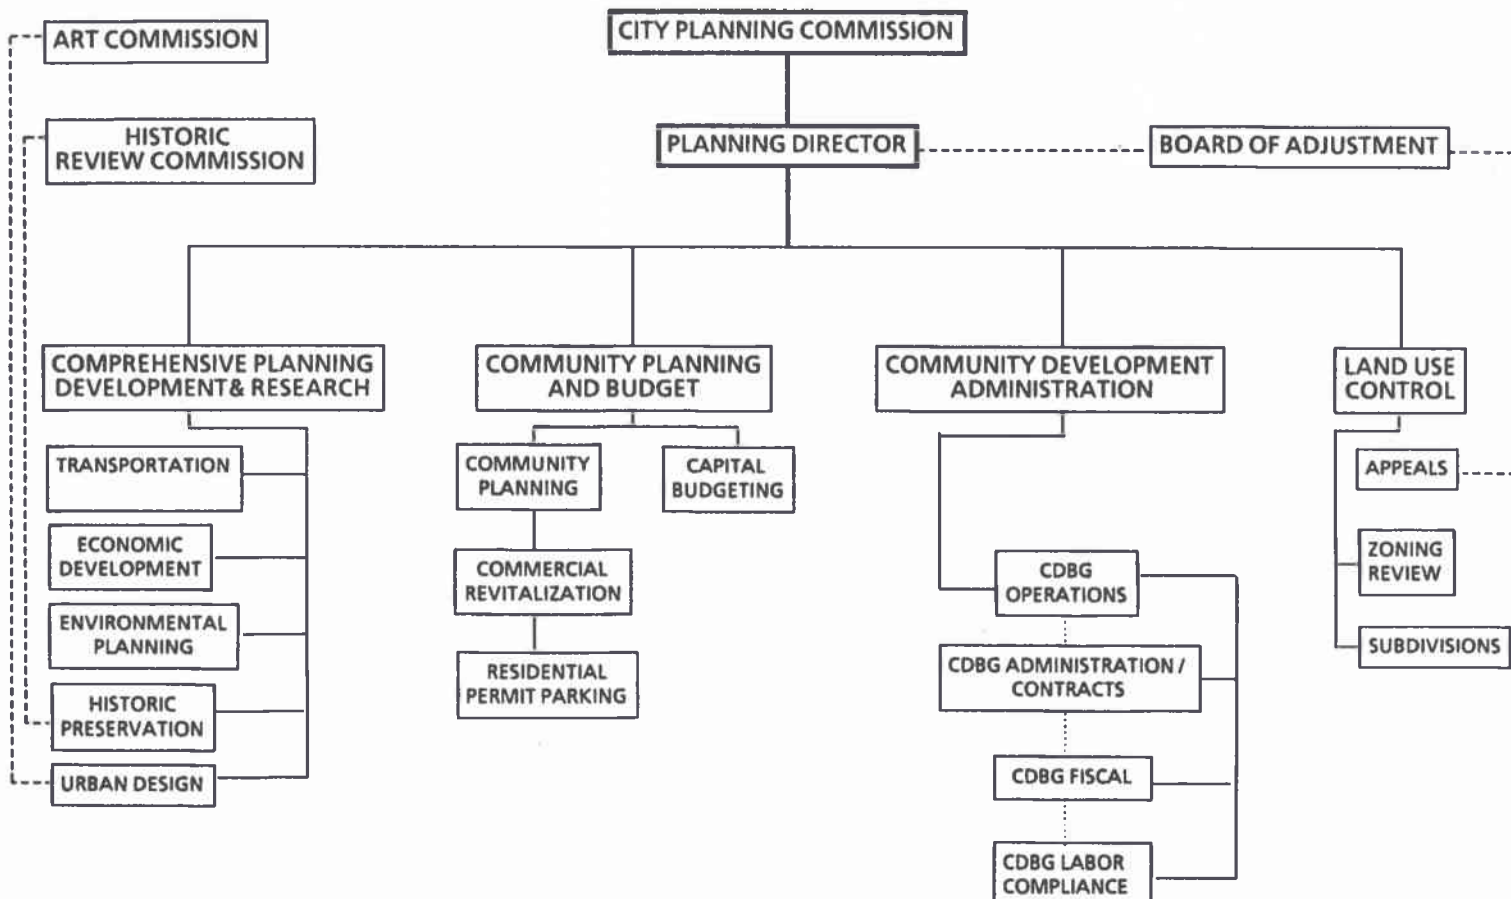

The Capital Budget Section coordinates the formulation of the Capital Budget and Six Year Development Program. The structural network provided by the Community Planning program permits citizen participation in the decision-making process of government, particularly in regard to the Capital Budget and the Community Development Block Grant Program.

Administration of the federal Community Development Block Grant (CDBG) program is the ongoing responsibility of the Community Development Administration Division of the Planning Department. Serving as a catalyst for development in the City's communities, this program provides entitlement grants for a wide range of projects, which address the housing, economic, and human service needs of low and moderate income residents, and neighborhoods.

The Planning Department's Land Use Control Division is responsible for administering the City's Zoning Ordinance, the Planning Commission's Subdivision Regulations and Standards as well as implementing policies adopted by the Commission and City Council. Development proposals involving zoning changes are reviewed by planning staff who, then make recommendations for consideration by the City Planning Commission. Variances, special exceptions, and interpretations of the Zoning Ordinances are managed by the Board of Adjustment, a three-member salaried board appointed by the Mayor with the approval of City Council.

The Department staffs the Historic Review Commission and the Art Commission, both appointed by the Mayor with the approval of City Council.

DEPARTMENT OF ENVIRONMENTAL SERVICES

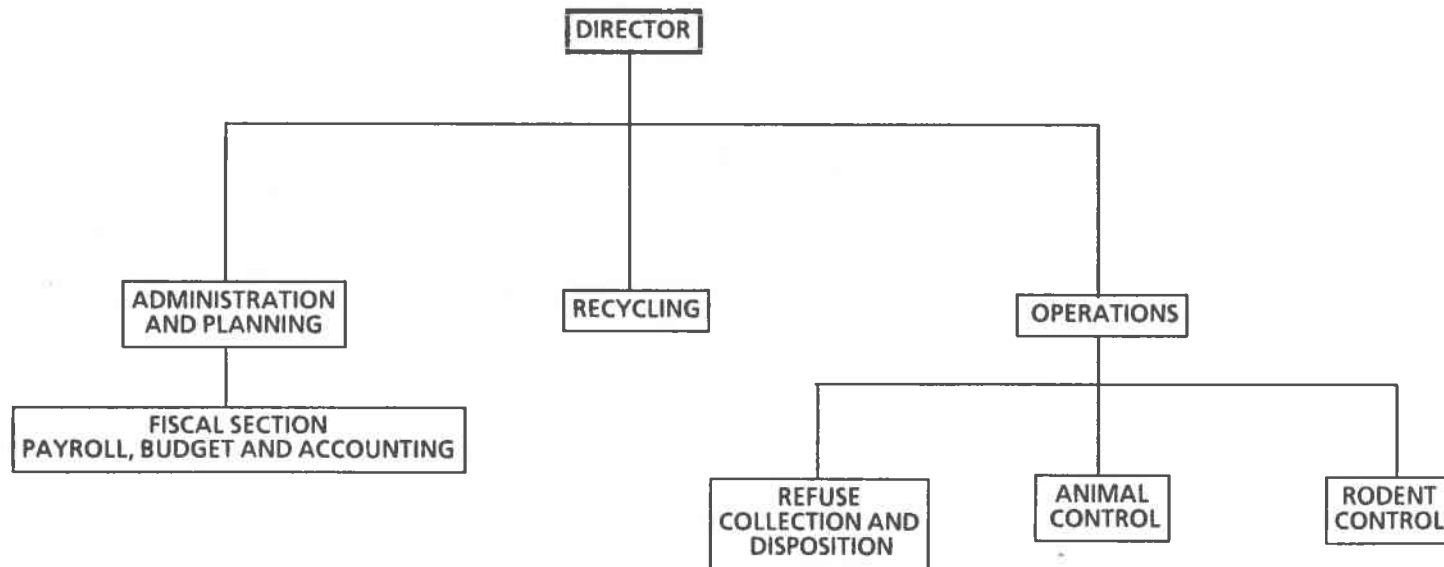

The Department Environmental Services is responsible for helping City residents maintain a clean, aesthetically appealing, and healthy environment. The Department has three divisions.

The Operations Division oversees all of the day-to-day functions of the department. The Residential Solid Waste Section collects and disposes of household solid waste on a weekly basis. In 1991, this division will implement a residential recycling program in order to comply with the Commonwealth of Pennsylvania's Recycling Act 101. Additionally the division will oversee the recycling drop off centers, bulk waste and white goods pick up and most leaf waste collection. The Animal Control Section is responsible for the enforcement of the ordinances governing the City's animal population and animal owners. The Rodent Control Section has the responsibility of educating the public in all areas of rodent infestations, along with monitoring the public's compliance with the City's ordinances governing solid waste management. In addition, the Rodent Control Section provides for the placement of rodenticides.

The Recycling Division is responsible for assuring both residential and commercial sector compliance with Act 101. This Division monitors state and federal laws and is responsible for changing or updating City ordinances where appropriate.

The Administration Division is responsible for all long term planning functions as well as all fiscal matters. These include payroll, accounts payable and receivable, and preparation of departmental budgets.

DEPARTMENT OF PUBLIC SAFETY

The Department of Public Safety consists of the Office of Professional Responsibility, the Office of Safety and Inspections, and five Bureaus-Emergency Medical Services, Fire, Building Inspection, Police, and Administration.

The Office of Professional Responsibility investigates and assists in resolving complaints concerning the conduct of Public Safety employees. The Office also performs background investigations on candidates for employment with the department.

The Office of Safety and Inspections manages the department's safety and inspection programs. These programs focus on decreasing accidents, preventing injury, and returning people to work. The Office of Safety and Inspections is also responsible for maintaining the City's Disaster Plan.

The Administration and Support Services Bureau consists of four divisions. The Education and Training Division operates the Public Safety Academy and provides educational and training services to Public Safety employees. The Communication Services Division receives emergency calls from the public and dispatches an appropriate type of response. The Support Services Division includes the Records Section which maintains police reports and generates crime statistics and the Warrant Office, Identification Section and Cell Block which are part of the criminal justice system. In 1991, responsibility for the operation of the City Tow Pound will be transferred from Magistrates Court to the Support Services Division. The Research and Evaluation Division is responsible for designing and implementing operational and management systems.

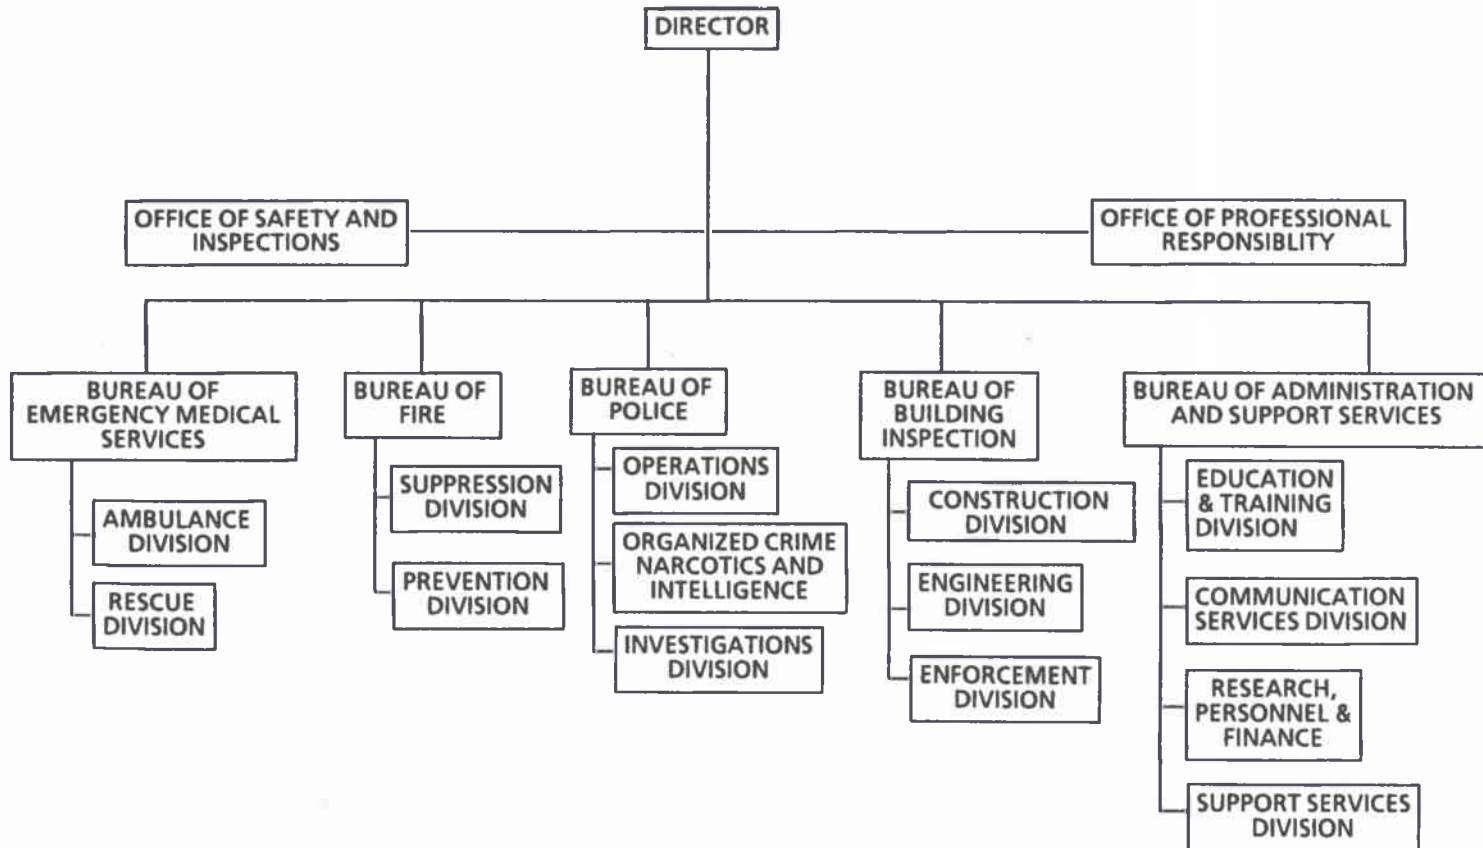

The Police Bureau is responsible for the protection of life and property, enforcement of criminal and traffic law, and crime prevention. The Operations Division includes six zones, traffic control, and special operations. The Investigations Division investigates and solves crimes against persons and property, and the Office of Organized Crime, Narcotics and Intelligence combats illegal drug manufacture, distribution, sale and use.

The Bureau of Building Inspection consists of the Engineering, Construction and Enforcement sections and is responsible for regulating all construction, demolition and occupancy. It issues all permits required by code for building repair, alteration or addition, and all permits required for new construction within the City.

The Fire Bureau provides fire prevention and fire suppression services. The Suppression Division operates the firefighting companies. The Prevention Division conducts community education programs and arson investigations. The two divisions operate a joint company inspection program which inspects commercial properties on a regular basis in order to eliminate hazards and allow suppression personnel to become familiar with building interiors.

The Emergency Medical Services Bureau is responsible for the provision of emergency medical and rescue services to residents and visitors. The Ambulance Division provides life support and hospital transport. The Rescue Division extricates victims from entrapment.

DEPARTMENT OF PUBLIC SAFETY

OVERALL GOAL

The Department of Public Safety will direct, support and coordinate the delivery of police, fire, emergency medical and building inspection services to promote and ensure the safety and well-being of the citizens and visitors of the City of Pittsburgh. The Police Bureau will support life and property and enforce the laws and ordinances of the Commonwealth of Pennsylvania and the City of Pittsburgh.

The Fire Bureau will prevent and decrease the likelihood of fires and promptly and effectively suppress fires to contain and reduce potential damage and loss.

The Emergency Medical Services Bureau will prevent loss of life, increase the likelihood of survivability, decrease severity of injury, prevent further injury and maintain patient functioning.

The Department of Public Works is responsible for maintaining and improving the City's systems of streets and sewers, bridges, and cable communications.

The Street and Sewer Maintenance Division is responsible for maintaining the City's streets, sewers, and catch basins. The Street Repair Division coordinates all street resurfacing activities. The Heavy Equipment Repair Division repairs all specialty equipment used by the Department. The Traffic Control Division maintains the City's traffic control system. The Painting Division paints all lines on City streets and produces and installs all traffic control signs.

The Construction Division employs skilled craftsmen who are capable of performing a variety of special and regular maintenance projects that would be more expensive if performed by contractors. Many small projects can be built quickly by this division in instances where regular maintenance will not suffice.

The Bureau of Cable Communications regulates the City's cable franchises.

DEPARTMENT OF PARKS AND RECREATION

Throughout the year, the Department of Parks and Recreation provides a spectrum of services that enable Pittsburghers of all ages to partake in physical, cultural, environmental learning and recreational experiences that add to a richer and fuller lifestyle. The Bureaus of Administration, Recreation, Parks, and the Pittsburgh Zoo develop, maintain, and operate programs and facilities that improve the standard of living for all residents.

Recreation programs are provided in neighborhood recreation centers, senior citizen centers, public schools, and playgrounds. Over 2,500 acres of parklands, including swimming pools, picnic shelters, ballfields, tennis courts, parklets, and tot lots, are maintained on a daily basis. In addition to community facilities, the Department boasts such special facilities as the Pittsburgh Zoo, Pittsburgh Aviary, Schenley Park Golf Course, and Phipps Conservatory.

New programs and facilities are implemented and existing programs evaluated and enhanced as a direct result of community input and involvement. In addition to an informational effort which maintains open lines of communication between the Department and the public, community meetings are scheduled to provide greater forums for discussion and planning of recreational needs. The Department continually surveys the impact of its programs and facilities while at the same time striving to improve the effectiveness of its operations.

DEPARTMENT OF PARKS AND RECREATION

OVERALL GOAL

The overall goal of the Department of Parks and Recreation is to provide high quality and leisure-time facilities and programs to all Pittsburghers. The Department aspires to provide close-to-home recreational facilities, beautify our City, preserve our natural resources, and offer opportunities for constructive, educational and enjoyable activities.

1989 - 1990 ACCOMPLISHMENTS

- Initiated and completed a Study of the Pittsburgh Zoo, Phipps Conservatory, and Aviary in order to increase revenues, and to develop specific recommendations for inclusion in the Mayor's Legislative Agenda.
- Increased maintenance productivity levels by replacing the entire tractor fleet and adding new specialized landscaping equipment.
- Completion and dedication of the new Handicapped Accessible Trail and Frick Woods Reserve in Frick Park.
- Pruned approximately 2,500 trees.
- Cleaned and cleared over 100 playgrounds with assistance from the Department of Public Works and Pittsburgh Clean City Committee.
- Successful privatization and opening of the enclosed South Side Skating Rink. The Rink is now called the "Neville Ice Arena" and opened to the public in September 1990.

LONG-RANGE OBJECTIVES

- To develop a Job Training and Employee Performance System for all Department employees.
- To continue to develop private support for park facilities and programs.
- To analyze current inventory of parks and playgrounds and determine, with community groups and the citizenry, those that can be eliminated and those that can be improved and enhanced.
- To develop recreational facilities and opportunities along our riverfronts.

SHORT-RANGE OBJECTIVES

- Implement a Maintenance Management System to assist in monitoring park expenses and provide data for more efficient decision making as related to scheduling and equipment, supplies and material purchases.
- Implement a computer program for the Forestry Division to more efficiently manage the tree maintenance program, which includes approximately 200,000 street trees.
- Increase revenue and attendance at the Zoo, Phipps Conservatory, and the Aviary.
- Develop and implement a volunteer program for park maintenance.
- Develop programs and events to increase recreational and commuter bicycling opportunities.
- Open the new \$7.5 million Tropical Forest Complex at the Pittsburgh Zoo. This facility will be dedicated to the conservation and preservation of endangered primates and other rain forest animals. The facility will also display a collection of plant life from all of the world's tropical forests.

DEPARTMENT OF WATER

On May 1, 1984, the City of Pittsburgh entered into a Lease and Management Agreement with the Pittsburgh Water and Sewer Authority to ensure the continued operation of the existing water and sewer system, and to implement a major capital improvement program. Under the terms of this Agreement, the City acts as Agent to operate and maintain an efficient and effective water and sewer system for the customers served by the system.

The Department of Water is comprised of four (4) divisions which coordinate to deliver potable water that is safe for human consumption and in adequate supply to ensure fire protection for the community.

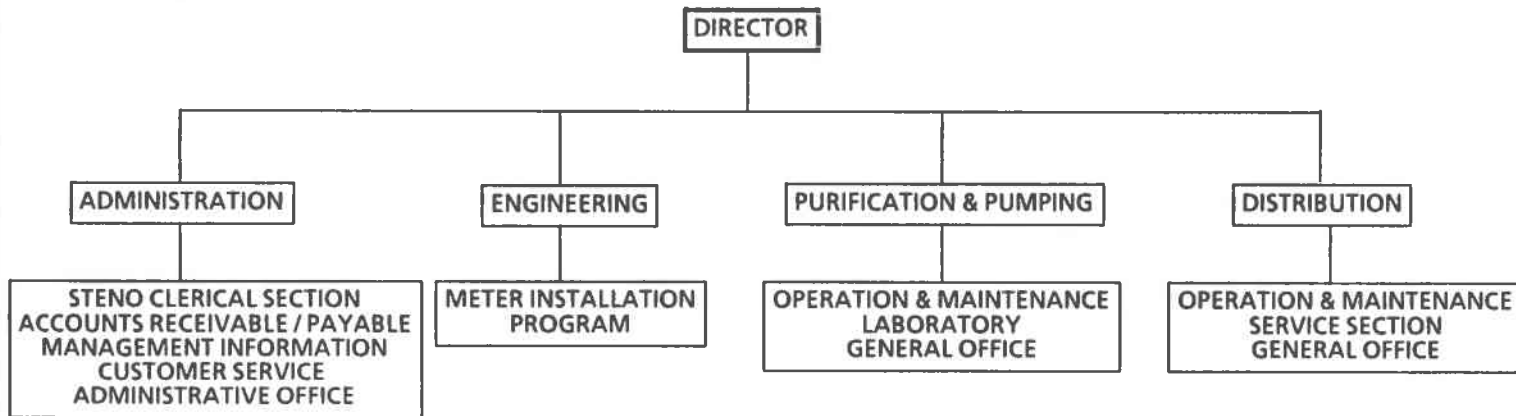

The Administration Division includes the Steno-Clerical, Management Information, Accounts Receivable/Payable, and Customer Service Sections. The Steno-Clerical Section provides support for the day-to-day activities generated by the various Water Department divisions. The Management Information Section is engaged in computer programming such as billing, operations, inventory control, and records updating. The Accounts Receivable/Payable Section is responsible for monitoring customer accounts and investigating delinquent accounts, issuing termination notices, processing invoices and requisitions, and balancing the quarterly appropriations. The Customer Service Section is responsible for reading meters, billing, and responding to customer inquiries concerning service. This division also oversees the remote meter installation program.

The Engineering Division acts as liaison between the Department of Water and the Department of Engineering and Construction for the effective implementation of the Pittsburgh Water and Sewer Authority's \$260 million Capital Improvement Program. They are also responsible for the management and coordination of valve, hydrant, and service line records.

The Distribution Division includes the Operations and Maintenance Section and the Service Section. The Operations and Maintenance Section maintains 1,200 miles of pipe, 25,000 valves, 7,000 fire hydrants, and other appurtenances that comprise the water distribution system. The Service Section provides a similar service for that portion of the distribution system that lies between the main and the customer's curb stop, commonly known as the service line. The Service Section also performs water meter installations, repair work, and the preliminary investigation of service requests, and operates the large meter replacement program. The Distribution Division is divided geographically into the Mission District and the Brilliant District.

The Purification and Pumping Division is involved in the treatment and purification of raw water, and is responsible for the operation and maintenance of 11 pump stations, 6 reservoirs, and 10 storage tanks. This division includes the General Office, Operations and Maintenance, and Laboratory Sections. The Operations and Maintenance Section regulates the pumps, clarifiers, filters, valves, and other appurtenances necessary to provide potable water to the reservoirs and storage tanks. The Laboratory Section constantly monitors the quality of water at various locations to ensure that all required standards are met and to provide test information to the Operations and Maintenance Section for proper treatment measures.

WATER DEPARTMENT

OVERALL GOAL

The Department of Water will continue to provide an efficient and effective water system and related services by delivering potable water that is safe for human consumption and in adequate supply to properly service its customers.

1989 - 1990 ACCOMPLISHMENTS

- Successfully implemented a delinquent accounts collection and termination policy.
- Improved customer service by creating a more efficient billing operation which has effectively reduced customer telephone and mail inquiries.
- Converted obsolete Treatment Plant system controls to a state-of-the-art computer-assisted pumping control system.
- Completed first pass through the City by installing 38,000 new water meters and remote reading devices over a two-and-one-half year period by means of the residential meter replacement system.
- Implemented a City-wide fire hydrant locking program in conjunction with the Bureau of Fire.
- Implemented a City-wide multi-connection party line and flat water service line replacement program.
- Avoided a major crisis by keeping the City supplied with water during the Buckeye oil spill of 1990.
- Administered feasibility study and participated in the marketing campaign to gain O'Hara Township as a new bulk rate customer.
- Successfully completed the pump replacement program for all pumping stations.

LONG-RANGE OBJECTIVES

- To implement a computer-assisted telephone delinquent accounts collection system.
- To complete, renovate and refurbish the Water Treatment Plant's finished water filtering system.
- To inspect, clean and refurbish the sedimentation basins at the Water Treatment Plant.
- To complete and bring on-line the Intergraph System by merging waterline mapping, drill sheets, valve and hydrant maintenance, and distribution work orders into one computerized network.

SHORT-RANGE OBJECTIVES

- Establish an on-going large meter testing and maintenance program to supplement the large meter replacement program. Without such a program, our new replacement meters will rapidly deteriorate.
- Retrofit Treatment Plant's travelling water screens by replacing various metallic component parts with non-metallic parts.
- Implement a bar coding system for the Department's inventory accounting.
- Create a field service section for delinquent accounts that are scheduled for "shut off".
- Implement a customer assistance program to avoid termination of water service by providing areas of relief to residential customers who have demonstrated that a hardship has caused a difficulty in meeting their water payment obligation.

SECTION 6. Any Resolution or Ordinance or part thereof conflicting with the provisions of this Resolution is hereby repealed as the same affects this Resolution.

PASSED IN COUNCIL December 21, 1990.

APPROVED January 4, 1991.

RECORDED IN BOOK VOLUME 124, PAGE 1164.

RESOLUTION--Fixing the number of officers and employees of the City of Pittsburgh, and the rate of compensation thereof, and setting minimum levels for designated positions.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF PITTSBURGH AS FOLLOWS:

SECTION 1. That from and after the first day of January, 1991, the number of officers and employees of all Departments of the City of Pittsburgh, and the rate of compensation thereof, shall be and the same are hereby fixed and established as herein set forth.

SECTION 2. To ensure the capacity of the City to provide an effective level of Municipal services which will meet the economic, physical and social needs of its citizens, residents, visitors and neighborhoods during the Fiscal Year for which this Resolution shall be in force, those positions designated by Section 3 of this Resolution shall remain filled for the entire Fiscal Year, subject to any reasonable time periods required to replace existing officers or employees who leave City employment for any reason during that Fiscal Year. There shall be no reduction in the number of filled positions so designated unless authorized by a Resolution amending this Budget Resolution, in accordance with Section 507 of the Home Rule Charter of Pittsburgh. In adopting this Resolution it is the intention of Council to provide funding for the annual Budget at a level which will enable all Departments and Units of City Government so designated to be staffed, equipped and maintained at the levels mandated herein.

If, during the Fiscal Year, the Executive Branch determines that the number of employees so mandated in any program can be reduced without substantially effecting the level of services to be provided, the Mayor may request an amendment to this Resolution to accomplish that reduction, and shall include with any request of that nature the reasons for the reduction and evidence as to the impact of that reduction upon the level of services provided.

SECTION 3. The minimum levels are established for the following positions:

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of land used for agriculture. This would mean clearing more forests and other natural habitats.

Another way to meet this demand is to increase the efficiency of agriculture. This would mean using more fertilizers and pesticides, and using more advanced farming techniques.

Both of these ways of meeting the demand for food and other resources have their own problems. Clearing more land for agriculture can lead to deforestation and the loss of biodiversity.

Using more fertilizers and pesticides can lead to pollution and health problems. Using more advanced farming techniques can lead to the loss of traditional knowledge and skills.

There are many other ways to meet the demand for food and other resources. Some of these ways are more sustainable than others.

One way to meet this demand is to reduce the amount of food and other resources that are wasted. This would mean eating less meat and dairy products, and using less food.

Another way to meet this demand is to use more sustainable farming techniques. This would mean using less fertilizers and pesticides, and using more natural methods of pest control.

There are many other ways to meet the demand for food and other resources. Some of these ways are more sustainable than others.

GLOSSARY

APPROPRIATION - The legal authorization granted by City Council to make expenditures and to incur obligations for specific purposes up to a specified dollar amount. Separate appropriations are made for Operating and Capital expenses for each department.

AS NEEDED POSITION - In the salary section of the budget, some position titles have as needed following the title. This means the exact number of positions with that title can vary during the year. This provides flexibility so that when changes in services occur, departments can use these titles to hire the necessary employees.

AUTHORITY - A city agency established to administer a revenue producing public enterprise (Parking Authority, Urban Redevelopment Authority).

BOND - An interest-bearing certificate of indebtedness sold by the city or another governmental entity to generate funds. The bond guarantees payment of the original investment plus interest by a specified date or dates in the future. Bonds typically involve long-term indebtedness to pay for capital projects. In the budget these payments are identified as debt service and include principal and interest payments.

BUREAU - A specific sub-unit of a department. Used synonymously with division.

CAPITAL BUDGET - Provides funding authorization for street improvements, building construction, equipment and facility maintenance. The Capital Budget is the first year of the Capital Improvement Program.

CAPITAL IMPROVEMENT PROGRAM - A six-year work plan for the provision of the City's long-term facility and infrastructure needs (buildings, roads, etc.). The plan, which is updated annually, includes a schedule by fiscal year of proposed construction phases, estimated project costs, and sources of funding.

CODE ACCOUNT - Every department has its spending plan detailed by major category. The categories include salaries, supplies and equipment. Each department has a unique number to identify these categories. In addition, every non-departmental item also has a unique number.

DEBT - All interest-bearing short and long-term credit obligations of the City and its agencies.

DEBT SERVICE - The annual payment of principal and interest on the City's bonded indebtedness issued to finance its Capital Improvement Program or to provide a Sinking Fund for the redemption of bonds payable from this fund.

DEPARTMENT - A major administrative unit or principal office of the City government that has overall management responsibility for an operation or group of related operations within a functional area. (Department of General Services, Department of Public Works.)

DIVISION - A specific sub-unit of a department. Used synonymously with bureau.

ENCUMBRANCE - An obligation to pay for future goods or services against budgeted funds in the form of a purchase order, contract, salary commitment or other reservation of available funds.

PERFORMANCE STATISTICS - Specific information on performance factors which permits management to assess what services the public received or will receive and how well they were delivered. Performance statistics include a unit of work (number of permit applications, number of households receiving refuse service or the number of burglaries to be investigated).

PREMIUM PAY - In special situations employees are entitled to payment over and above their normal wage. Examples may include acting in a higher position and working beyond normally scheduled hours.

PRIOR YEAR LIABILITIES - Funds encumbered in a prior year but paid in the current year for all departments.

RATE - A specific wage paid to employees for each hour worked.

SINKING FUND - A fund established for a periodical contribution (and therefore earnings) to provide for the retirement of outstanding debt specified to be retired from such funds.

SUB-ACCOUNT - The code accounts are further broken down by the detailed items that make up that account.

TOTAL DISABILITY - See Worker's Compensation.

TRUST FUNDS - Used to account for assets controlled by a government in a trustee capacity. Revenue is received and funds expended.

VACANCY ALLOWANCE - The salary code accounts are not fully funded due to the time lag involved in hiring new employees.

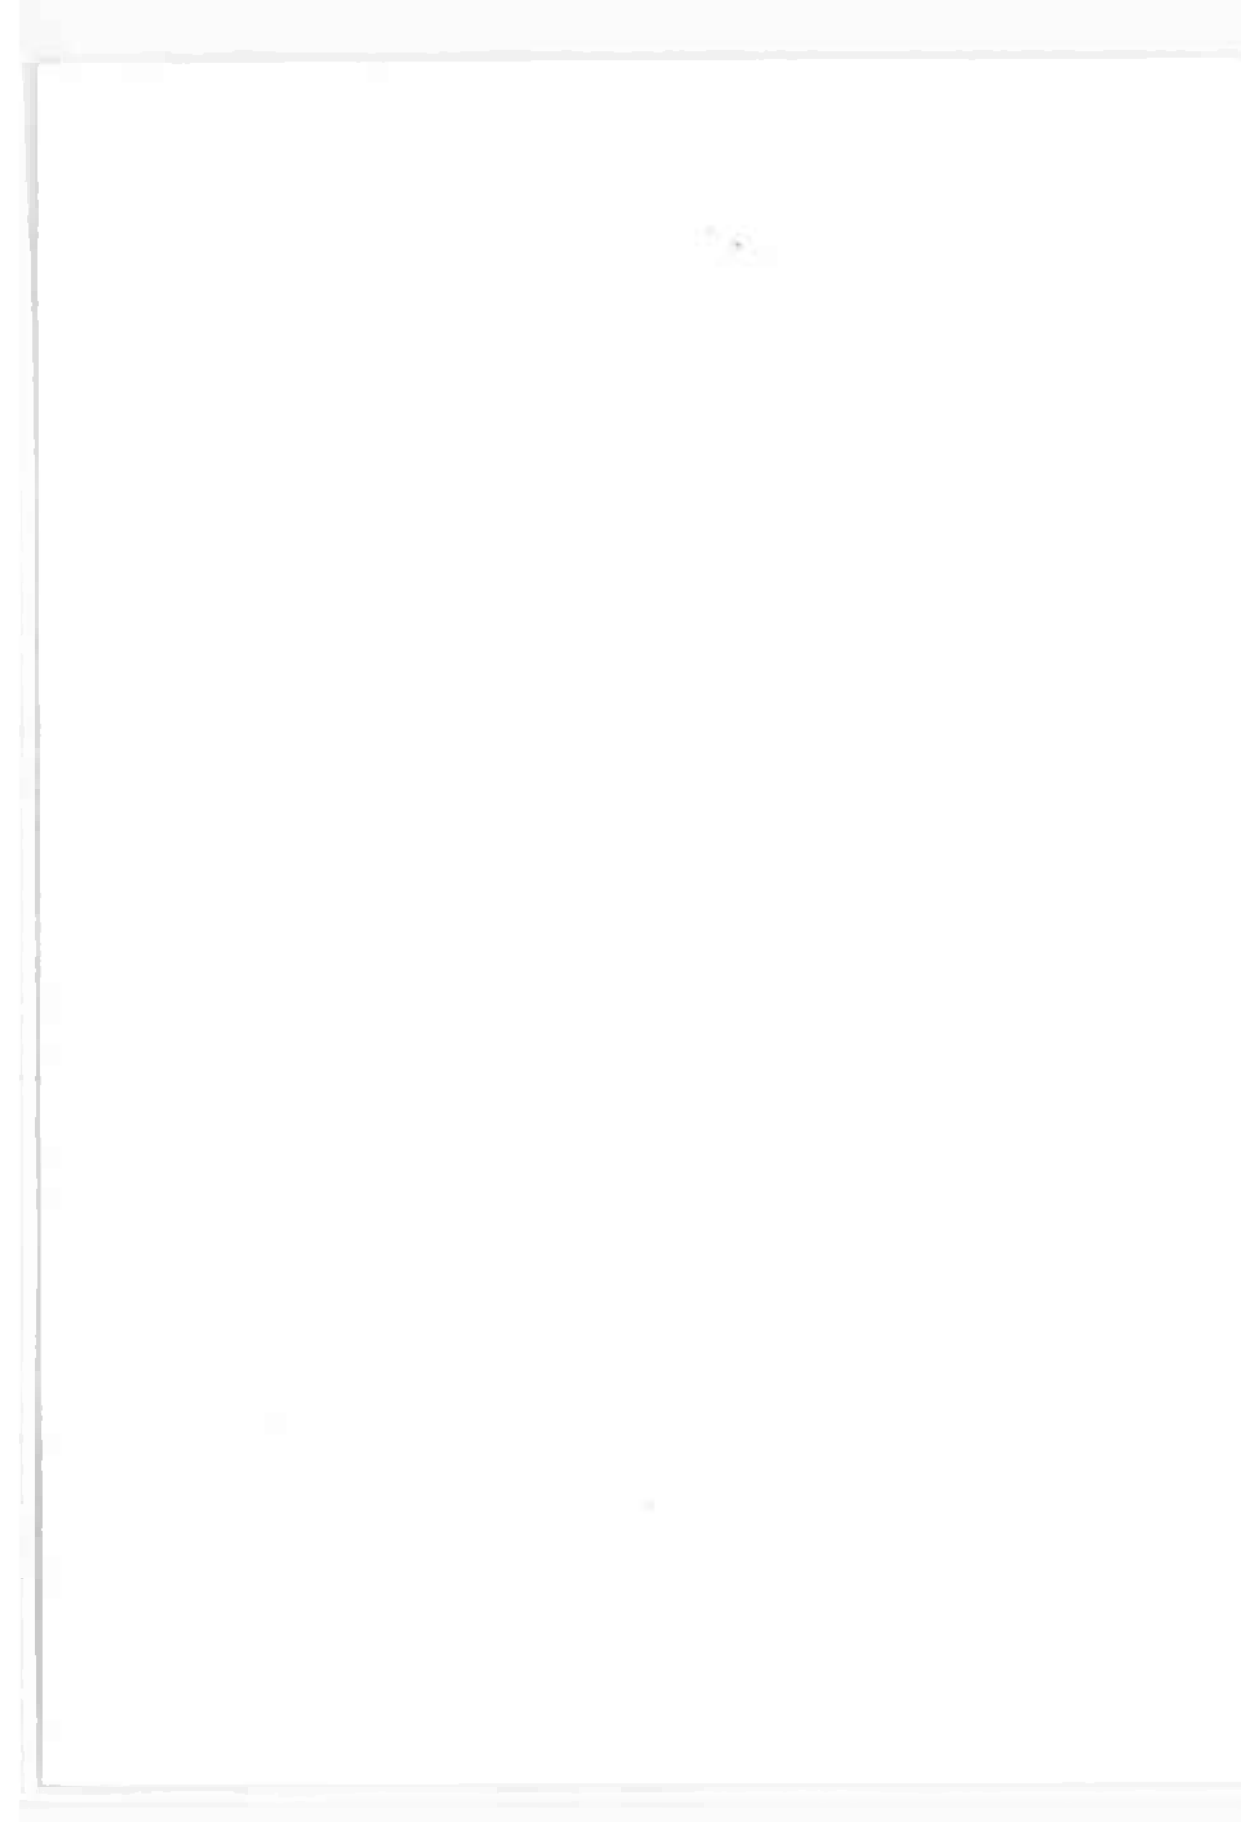

WORKER'S COMPENSATION - Each department or bureau has an individual worker's compensation code account. This account is broken down by three main categories. Indemnity - These are payments to employees who are injured while performing their duties and are absent from work for the time specified by the Commonwealth's Worker's Compensation Law. Medical - These payments are for the medical costs associated with the employee's work related injury. Total Disability - The costs associated with employees who received work related injuries and are not able to return in their original title.

SECTION 4. Any Resolution or Ordinance or part thereof conflicting with the provisions of this Resolution is hereby repealed as the same affects this Resolution.

PASSED IN COUNCIL December 21, 1990.

APPROVED January 4, 1991.

RECORDED IN BOOK VOLUME 124, PAGE 1432.

RESOLUTION NO. 1415

"RESOLUTION-adopting and approving the 1991 Capital Budget and the 1991 Community Development Block Grant Program; and approving the 1991 through 1996 Capital Improvement Program," by adjusting various line items in conformance with City Council's 1991 Capital Budget amendments.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF PITTSBURGH AS FOLLOWS:

SECTION 1. The 1991 Capital Budget and the 1991 Community Development Block Grant Program is hereby adopted and the new project authorizations and Community Development Block Grant Program categories listed therein are hereby approved. All other Capital Projects not previously designated as Community Development Block Grant Program categories and currently on the records of the City Controller which are not included in this resolution, or any subsequent resolution, are hereby cancelled.

SECTION 2. The 1991 through 1996 Capital Improvement Program is hereby approved as a guide, but new project authorizations are made subject to approval by Council through adoption of the annual Capital Budget and Community Development Block Grant Program.

SECTION 3. The City Controller and the City Treasurer are hereby authorized to place in the Bond Fund all cash currently on hand from the proceeds of the sale of debt and to accept reimbursement to such fund from other sources for expenditures made under Federal, State or private grant programs.

SECTION 4. The City Controller and the City Treasurer are hereby authorized to transfer from the Bond Fund to the Sinking Fund such funds as may be received as reimbursement for Capital Projects for which Bond Anticipation Notes have been specifically sold in previous years to fund such reimbursable projects.

SECTION 5. In accordance with Ordinance 694 of 1990 all cost projections will be made at the time each project is bid.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased. The world population is now over 6 billion, and it is expected to reach 9 billion by the year 2050. This means that there are more people in the world who need food. Another reason is that the world's food supply is not increasing fast enough to keep up with the growing population. This is because the world's food supply is based on a few crops, such as wheat, rice, and corn, which are grown in a few countries. This means that if there is a problem with the food supply in one of these countries, it can affect the whole world.

There are a number of ways in which the world's food supply can be increased. One way is to increase the amount of land that is used for growing food. This can be done by clearing more land for agriculture. Another way is to increase the amount of food that is produced on the same amount of land. This can be done by using better farming techniques, such as using fertilizers and pesticides. A third way is to reduce the amount of food that is wasted. This can be done by encouraging people to eat less meat and more vegetables, and by reducing the amount of food that is thrown away.

There are a number of ways in which the world's food supply can be made more secure. One way is to diversify the world's food supply. This means growing a wider range of crops, so that if one crop fails, there are other crops that can be eaten. Another way is to improve the world's food storage facilities. This means building more warehouses and silos, so that food can be stored for longer periods of time. A third way is to improve the world's food distribution system. This means making sure that food is available to all people, and that it is distributed fairly.

There are a number of ways in which the world's food supply can be made more sustainable. One way is to use renewable resources, such as solar energy, to power the world's food production. Another way is to use sustainable farming techniques, such as organic farming, which do not use fertilizers and pesticides. A third way is to reduce the world's carbon footprint, which means reducing the amount of greenhouse gases that are produced by the world's food production.

There are a number of ways in which the world's food supply can be made more equitable. One way is to ensure that all people have access to food. This means making sure that food is available to all people, and that it is distributed fairly. Another way is to ensure that all people have access to the resources that are needed to produce food. This means making sure that all people have access to land, water, and other resources. A third way is to ensure that all people have access to the knowledge and skills that are needed to produce food. This means making sure that all people have access to education and training.

There are a number of ways in which the world's food supply can be made more resilient. One way is to make the world's food supply more resistant to drought and other natural disasters. This can be done by using drought-resistant crops and by building more resilient food storage facilities. Another way is to make the world's food supply more resistant to pests and diseases. This can be done by using natural pest control methods and by building more resilient food storage facilities. A third way is to make the world's food supply more resistant to economic shocks. This can be done by diversifying the world's food supply and by improving the world's food storage facilities.

There are a number of ways in which the world's food supply can be made more secure, sustainable, equitable, and resilient. This means making sure that food is available to all people, and that it is distributed fairly. It also means making sure that all people have access to the resources that are needed to produce food, and that all people have access to the knowledge and skills that are needed to produce food. Finally, it means making sure that the world's food supply is more resistant to drought and other natural disasters, pests and diseases, and economic shocks.

This means making sure that food is available to all people, and that it is distributed fairly.
